

THE ONLINE SERVICE OF INFO-  
TECHNO BAUDATENBANK GMBH  
FOR CONSTRUCTION TENDERS

## **AUSSCHREIBUNG.AT**

CONNECTS CLIENTS AND  
CONTRACTORS IN THE  
AUSTRIAN CONSTRUCTION  
INDUSTRY.

### **SUCCESS STORY**

As part of the electronic award, the tendering bodies send offers to the executing companies via the portal AUSSCHREIBUNG.AT. You submit an offer based on the submitted tender documents. The tender documents are also sent to Post via the portal.

When submitting an electronic offer, it is necessary for procurement law reasons for the provider to provide his offer with a qualified electronic signature. A qualified signature based on the primeSIGN solution from CRYPTAS is used at this central point.

The provider benefits from a simple signature solution that is directly embedded in the offer creation workflow and significantly simplifies electronic offer creation without media discontinuity.

The customer can check the validity of the signature and thus rely on a qualified signed offer.

### **IMPORTANT REASONS FOR PRIMESIGN**

- ☞ A clean, user-friendly interface
- ☞ Step-by-step guide by a wizard
- ☞ Can be integrated directly into the bid submission workflow
- ☞ Fulfillment of procurement law requirements  
"Use of a Qualified Electronic Signature"

The online service of INFO-TECHNO Baudatenbank GmbH for building tenders – AUSSCHREIBUNG.AT – is a specialist portal for building tenders with a focus on structural engineering, civil engineering, electrical engineering, installation technology, transport infrastructure, sanitary engineering, planning, construction management and coordination. Clients benefit from the secure and time-saving transmission of their tender documents. Contractors can obtain up-to-date and complete information about tenders in their department and region and submit offers to clients. More than 70,000 successfully completed projects demonstrate efficiency as an indispensable catalyst when acquiring construction contracts.
