

PRIMESIGN FOR ALL CLASSIC SIGNATURE AND OFFICIAL SIGNATURE FLOWS

OFFICE OF THE CARINTHIAN STATE GOVERNMENT

SUCCESS STORY

The state of Carinthia operates a central primesign infrastructure for processing classic signature processes.

The employees of the Carinthian state government are able to use a personal, digital signature using a mobile phone signature/Austrian ID card or a signature card.

The central primesign infrastructure was well integrated into the IT system landscape of the province of Carinthia, so that the employees of the provincial administration at all levels can process their personal, electronic signatures with primesign in different application scenarios, including via mobile devices.

For this purpose, the personal, electronic signature with primesign was integrated directly into the central, digital file management and workflow system.

OUR SOLUTION

- ☞ On-site installation of the primesign SIGNATURE SERVER
- ☞ Adaptation of the user interface to customer requirements
- ☞ Integration into the file management system of the province of Carinthia
- ☞ Signature with Austrian citizen card and mobile phone signature
- ☞ Support and Maintenance Services

Carinthia is the southernmost province of Austria. The Carinthian state government is the supreme authority for enforcing state laws. It consists of the governor, his two deputies and four state councillors.

The Carinthian provincial administration, with around 4,000 employees, is responsible for handling all tasks from budget preparation to citizen service. Depending on the area of responsibility, these are carried out by the office of the state government, the district administrations and the state authorities.

"With the use of primesign, we wanted to take another digitization step, improve workflows and at the same time ensure that all legal bases of administrative processes can be observed. That worked perfectly!"
