

# authentication : **LoA high**

real **phishing resistant**  
for digital identities.

we establish trust.

## Strong Authentication

**Phishing-resistant, cryptographic end-to-end security** that meets both **current** and **future regulatory standards**.

**One Card for all** – to provide **maximum user experience** (privileged accounts, email encryption, visual identity, physical accesses, cafeteria, parking, etc.), and high-speed authentication in virtual desktop environment.

**Cost-effective operations** thanks to a **high degree of automation, 24/7 self-service** and **simple administration**.

**Economic efficiency** with the highest security level **LoA high (4) VCS**.

Implementation based on a **standard-compliant assessment** of the **required levels of assurance (LoA)** such as NIST 800-63B, ISO29115, ...

- **High user experience**
  - . **No password change**
  - . **One card** for all
  - . **Self service** and **VSC**
  - . **Extremely fast** in virtual environments
  - . **NFC or smartphone**
- **Real phishing resistant**
- **PKI and FIDO2 integration**
- **Audit reports and documented processes**
- **ISO29115 | LoA high and very high (3&4)**

real **phishing resistant**  
for digital identities.
